SUMMARY

Summary :

Hello! 👋 My name is Sami and I'm a programmer & front-end developer, I'm currently learning HTML, CSS & Javascript! I've been coding for more than 1 years+, and still today, this large domain interests me more than ever! ❤️ I've been a freelancer on Fiverr.com for more than 3 years, well I'm not proposing any programming/web development services at the moment but as soon as I will become a talented programmer with a lot of experience then maybe I'll try selling my skills in there. 😊 Also please note that I'm not available to hire, this resume is only temporary.
